

Instructions without application stencil/applicator

iPad Air / Air 2
iPad Pro 9,7"
iPad mini 2 / mini 3
iPhone 4
iPhone 5

The following installation instructions explain how to apply GLAZ to an iPhone 4/4s, 5/5s/5c and an iPad Air/Air 2, Mini 2/3. To ensure a clean, optimal application, we recommend a smooth table surface and sufficient space and light. Should you have any additional questions about the product please either consult our [FAQs](#) or get in touch through the [contact form](#)!

1st step

Open the package to take out the product, delivery order and installation instructions without application stencil/applicator.

2nd step

Take the delivery order from the first flap. You will find the installation instructions on the delivery order.

3rd step

Take the product and the accessory kit from the second flap.

4th step

Unwrap GLAZ and the accessories.

5th step

Use the alcohol impregnated wipe to remove dirt from your device. Give the front and the edges a thorough wipe.

6th step

Then use the microfiber cloth to clean the display.

7th step

Pull off the sticker and place the sticky side on the display. Repeat this until the screen is completely free of all dust. Make sure that you don't touch the screen again with your fingers.

8th step

Now pull the strap to remove the film protecting GLAZ.

9th Step

Now, carefully place the applicator with the GLAZ product onto your screen, so that GLAZ is well centred on your display. Use the home button for orientation purposes.

10th step

Now press GLAZ with your finger on the screen. Wait a little while and watch GLAZ adjust itself on your device. Now wait for 5-10 minutes, until GLAZ has completely bonded, then continue with the next step.

11th step

Now use the small stiff-bladed tool to push the last blisters from the centre of the screen towards the edges. To do so, press lightly with the tip of the tool onto the display, thus pushing the blisters towards the edges.

12th step

To remove trapped air, disperse it in circular movements with a microfiber cloth from the centre towards the edges.

13th step

Your new GLAZ screen protector should now be perfectly attached to your device.

Other interesting answers:

Can I re-use my GLAZ screen protector?

In general, re-use is not possible. If, however, you failed to clean your display properly, you can try to carefully remove the GLAZ screen protector in a dust-free area. After cleaning your display you should re-mount it carefully.

A removal of the screen protector will automatically void any guarantee. It is not designed for re-use.

How can I remove my GLAZ screen protector?

Simply pull of the screen protector, then clean the display.

Which cleaning agent can be used before placing the film on the device?

The Mounting Kit (alcohol pad, microfiber cloth, dust absorbing sticker) which comes with the product includes everything you need to keep your screen protector perfectly clean. Please don't use any other cleaning agents, as their active ingredients may harm the screen protector. Should you choose to use them anyway, this will be your own responsibility and any warranty shall be voided

Can I clean my GLAZ screen protector from inside?

Cleaning the GLAZ screen protector from inside is impossible. The cleaning process would damage the acrylic coating, so that it would no longer stick to the display.

How should I dispose of GLAZ?

Ensure that you dispose of the screen protector film in a safe manner in order to avoid injuries to yourself and others. It is possible to recycle the screen protector film. When handling it, we recommend you wear sturdy safety gloves, especially if you should try to remove pieces of glass. Wrap the fragments up in a few pieces of paper. Do not throw them in the domestic waste, but into the recycling bin. Use a hard broom to sweep the area where the glass broke so that you can be sure that you removed all remaining fragments. Please handle the screen protector film with the same sense of responsibility and care you would take for any other glass product.

Can I return the product if I ordered the wrong one?

Please get in touch with us. To do so, please fill out the contact form under contact. Please ensure you mark your order number on the contact form, so that we can get your exchange right.

What if my product arrives damaged?

Contact us under [contact](#). Under notes, please do not forget to write down the order number and the type of damage, so that we can attend to your complaint.

How do I properly care for my GLAZ screen protector?

To care for your screen protector all you need is the enclosed microfiber cloth.

Safety and care

Tempered glass is the safest type of glass. It ensures a balanced inner tension, which means that if the glass breaks, it does not splinter into many sharp fragments but instead disintegrates into small pieces. This means that tempered glass is not 100% safe and can still cause cuts and injuries. You should therefore be aware of the dangers of tempered glass and take appropriate safety precautions. If you continue using damaged tempered glass, this may lead to further splintering, which may cause injury to the user or a person in his/her vicinity. Keep the screen protector away from sand and stones, as these may scratch the surface and/or cause its fragmentation. Keep the screen protector away from extreme sources of heat or cold. Do not dip the protective film into hot or cold water. The thermal shock may cause the tempered glass to shatter.

Handling and disposal

Ensure that you dispose of the protective film made of tempered glass safely to avoid injuries to yourself and others. It is possible to recycle the screen protector film. When handling, we recommend you wear sturdy safety gloves, especially if trying to remove pieces of glass. Wrap the fragments in several pieces of paper. Do not throw them in the domestic waste, but into the recycling bin. Use a hard broom to sweep the area where the glass broke until you are sure that you have removed all remaining fragments. Please handle the screen protector film with the same sense of responsibility and care as for any other glass product. Enjoy your state-of-the art display protector!
